What is ups & how does it work?

UPS, also known as Uninterruptible Power Service, acts as a battery backup due to all sorts of power-related problems. UPS for desktop helps in preventing data losses, as computers are designed with battery support like laptops. UPS is one of the essential computer accessories, which ensures 100% protection against power fluctuations.

How to choose an uninterrupted power supply?

Generally, the power supply is chosen based on the form factor of the server, motherboard, and wattage. Safeguard your computers and their internal parts by investing in these electronics accessories that suit various computer-based applications. Buy Uninterrupted Power Supply online & find brands like APC, DELTA, SOCOMEC & much more.

What is a line-interactive UPS & a computer power supply?

With the Line-Interactive UPS, the unit will regulate the voltage supply regularly during low power and no power conditions. During power shortage, the UPS converts battery power to AC supply to various desktop devices. A computer power supply converts main AC power to low-voltage DC power to various internal parts of the computer.
