

# **UPS uninterruptible power supply can be used for several hours**

## Overview

---

What are uninterruptible power supply hours?

Uninterruptible Power Supply hours refer to the duration a UPS can sustain power to connected devices during an outage. This time can vary widely based on several factors, including battery capacity, load requirements, and the UPS's efficiency. Knowing how to calculate this can help you select the right UPS for your needs.

How long can a UPS run?

Yes, a UPS (Uninterruptible Power Supply) can run for 2 hours, but this depends on its capacity and the load it supports. Most standard UPS systems are designed for short-term power outages, typically providing backup power for 5 to 30 minutes. However, larger systems or those with additional battery packs can extend runtime to 2 hours or more. 1.
