

UPS uninterruptible power supply device serial number

Overview

What is a uninterruptible power supply (UPS)?

A UPS, or a uninterruptible power supply, is a device used to backup a power supply to prevent devices and systems from power supply problems, such as a power failure or lightning strikes.

What is etindustrial network uninterruptible power supply (UPS)?

ETIndustrial Network Uninterruptible Power Supply (UPS) SPECIFICATIONS
The Uninterruptible Power Supply (UPS) shall be powered by 24VDC (nominal) input and provide 24VDC (nominal) output at 100 Watts (max.) for a duration of 1.0 minutes, typ. Ultracapacitors shall be employed for energy st.

What happens if a ups fails?

During normal operation, the input power supply bypasses the UPS and is output as-is. During backup operation when a power failure or an instantaneous voltage drop has occurred, the UPS changes to inverter operation with power supplied from its internal battery. Selection Method.

Is a ups a primary surge protection device?

A UPS delivers second-level protection against surges; it should never be considered a primary surge protection device. It also continually regulates incoming voltage and provides an internal battery that allows connected equipment to continue running even if the power supply is cut.
