

Uninterruptible Power Supply Equipment Order

Overview

What is an uninterruptible power supply?

Uninterruptible power supplies or UPSs are battery chargers consisting of a combination of convertors, switches and energy storage devices (such as batteries), constituting a power system for maintaining continuity of load power in case of input power failure. 10 CFR 430 Appendix Y 2.27.

Are battery-backed uninterruptible power supplies reliable?

Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptible power supplies (UPS) are one option to protect and keep electronic equipment operating in the event of grid power failure.

What are the components of a UPS system?

Components: Parts of a typical UPS system are an inverter, which transforms stored DC power back into AC power after a power loss, a battery, which stores electrical energy, and a rectifier, which converts incoming AC power to DC power for charging the internal battery.
