Overview

What is explosion-proof lithium ion battery pack technology?

Technical principles explosion-proof lithium ion battery pack technology mainly improves the safety of battery pack in the following ways: diaphragm design: high temperature diaphragm material is adopted to improve the high temperature resistance of battery pack and avoid short circuit of battery caused by high temperature.

Can lithium battery pack be used in underground coal mining?

In coal mining industry, specifically in underground coal mining, the requirements on lithium battery pack applications are very stringent with various engineering constraints imposed on them, which, in most cases, make the application of lithium technology in such an environment unfeasible or impractical.

How much energy does a battery pack hold?

The model box used is the "XL" (LSBX0155) and the total capacity/energy of the battery pack is 7000 Wh (7 kWh). Never before has a fire containment system been successfully tested to contain such a high energy load. Visit our other Battery Box website for more information !
