

Vientiane Small Wind Power Generation System

Overview

What is monsoon wind power?

Monsoon Wind Power is the first wind energy project in Laos and the largest wind farm in ASEAN, spanning across Laos and Vietnam to drive sustainable energy solutions in the region.

How is wind power subsidized in Vietnam?

An amount of 207VND (fixed at 1US cent) is subsidized via the Vietnam Environment protection Fund (VEPF). It is also stated that the power purchaser must buy all electricity generated from wind power projects which meet the eligibility criteria indicated in this Decision.

What is small scale wind technology in Vietnam?

Vietnam has had experience with small scale wind technology through the Research Centre for Thermal Equipment and Renewable Energy (RECTERE) of Ho Chi Minh City Technical University. For twenty years, RECTERE has manufactured and installed household wind energy systems with a rated power of 100 W – 500 W.

What is the wind power potential in Vietnam?

Subsequently, the Wind Resource Atlas of Vietnam was published in 2011. The total technical potential for wind power development in Vietnam is believed to be at 24GW according the atlas. Developers and experts in the sector, however, perceive this to be overoptimistic and not always backed by existing wind measurements at 60m/80m height.
