

Vietnam Industrial solar container battery Recommended Source

Overview

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

Does Vietnam have a green energy policy?

Reduced usage fees for the following nine years. Output guarantees covering at least 70% of contracted electricity during the loan repayment period (up to 12 years), provided grid conditions and project performance are met. This signals Vietnam's commitment to pioneering green fuels alongside solar and wind.

Does Vietnam have a long-term Power Purchase Agreement (PPA)?

Power producers will continue to sign long-term power purchase agreements (PPAs) with Vietnam Electricity (EVN), the state utility, under existing contractual frameworks. Vietnam's FiT scheme has been instrumental in driving clean energy development since its introduction.

What are the new fits for solar power projects?

These updated FiTs aim to enhance grid reliability while aligning with the nation's broader energy transition strategy. The most significant development in this update is the introduction of differentiated tariffs for solar power projects that incorporate battery storage.
