

# Western European rooftop solar inverter

## Overview

---

How big is the European solar inverter market?

The European solar inverter market is set to grow from USD 2.85 billion in 2024 to USD 3.66 billion by 2029, with a growth rate of 5.06% annually. This growth is driven by government incentives, investments in solar energy, and a focus on reducing carbon emissions. Germany is the largest market, followed by the UK and France.

Who makes the most solar PV inverters in the world?

In 2023, the global shipment of solar PV inverters reached 536 GWac, with Chinese solar inverter manufacturers responsible for half of these shipments. Companies like Huawei, Sungrow, and Ginlong Solis dominate the top ranks, securing more than 50% of the global market share.

Which countries use the most solar inverters?

Germany is the largest market, followed by the UK and France. Central inverters for large solar projects are expected to dominate, while micro inverters for homes are also growing. Hybrid inverters, which combine solar and battery storage, are gaining popularity as more people seek energy independence.

Which inverter companies dominate the global market?

Companies like Huawei, Sungrow, and Ginlong Solis dominate the top ranks, securing more than 50% of the global market share. China's manufacturing capabilities are backed by massive national investments and cutting-edge technologies, making Chinese inverters highly competitive in terms of performance, reliability, and price.
