

# What is the communication 5g base station setting plan

## Overview

---

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

What are the key elements involved in setting up a 5G network?

Here's a technical overview of the key elements involved in setting up a 5G network: 1. Radio Access Network (RAN): Base Stations (gNodeB): These are the primary transmitters and receivers responsible for wireless communication with user devices. They are deployed throughout the coverage area and connected to the core network.

How to set up a 5G network?

Setting up a 5G network is a complex process that involves careful planning, coordination, and integration of various components. It requires collaboration among telecom operators, equipment vendors, and regulatory bodies to ensure a successful deployment.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.
