

Which country exports the most solar modules

Overview

China exported 16.63 GW of modules in December 2024, up 9% MoM from 15.2 GW and up 3% YoY from 16.18 GW, according to InfoLink's customs data. Which countries import the most solar modules?

Brazil accounted for 68% of the region's total imports, followed by Chile at 7%, with imports totaling 2.48 GW of modules. The Middle East imported 1.97 GW of modules from China in December 2024, up 16% MoM from 1.7 GW and up 31% YoY from 1.5 GW. China exported 5.9 GW of modules to the Middle East in 4Q24, up 42 % YoY from 4.15 GW.

Which countries export solar power?

The 5 most lucrative exporters of solar power products are mainland China, Vietnam, Malaysia, Germany and Japan. By value, that quintet of leading exporters earned nearly three-quarters (72.6%) from solar power products exported in 2022. Below, you will find a list of the 15 best exporters of solar power sorted by highest international sales.

What are China's solar PV exports?

In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Viet Nam also made these countries major exporters of PV products, accounting for around 10% and 5% respectively of their trade surpluses since 2017.

Which country imports the most modules in the world?

South Africa accounted for 34% of the region's total imports, followed by Morocco with 10%, with imports totaling 1.13 GW of modules. The global market grew in 2024 compared to 2023, except for Europe, where shipments fell by 7%.

Which country exports the most solar modules

The trend of "volume increase and price decrease" in PV module exports

Jun 26, 2024 · By the end of May 2024, total exports of PV modules this year totaled \$13.62 billion, or about 97.9 GW. From the country distribution point of view, the Netherlands, Brazil, ...

[Which countries are solar cells exported to? NenPower](#)

May 30, 2024 · The countries that receive exports of solar cells vary widely across different regions and geopolitical contexts. 1. China, 2. United States, 3. Germany, 4. Japan, 5. India, 6. ...

[4 Countries Exported More Than 70% of World's Key Solar. ...](#)

Gandhinagar, 3 April 2023: Only four countries - China, Japan, Malaysia and Germany - supplied 70 per cent of the global exports in solar photovoltaic cells/modules in 2021, according to an ...

[Analysis of countries exporting Chinese photovoltaic energy ...](#)

Nov 22, 2024 · The rapid growth in demand for PV energy storage products has also driven economic development. According to PV InfoLink statistics, China's total exports of modules in ...

[China's solar PV module exports hit 236 GW in 2024, with...](#)

Feb 4, 2025 · Among African countries, South Africa accounted for the largest share, importing 3.81 GW of Chinese modules in 2024, down 7% YoY from 4.11 GW. South Africa accounted ...

[Executive summary - Solar PV Global Supply Chains](#)

6 days ago · Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's ...
