

# Which new energy storage company is the best in the United Arab Emirates

## Overview

---

How has the UAE's power sector changed in 2023?

The UAE's power sector emissions grew three-fold in the last two decades, in line with the demand growth over the period, fuelled by gas. Nuclear and solar have grown rapidly, together contributing 28% in 2023, up from less than 1% of generation in 2018.

What percentage of UAE electricity is generated from low-carbon sources?

28% of the UAE's electricity was generated from low-carbon sources in 2023, below the global average of 41% in 2024. It was the 28th largest country by electricity demand. The UAE's largest source of clean electricity is nuclear (20%). Its share of wind and solar (8.4%) was below the global average in 2023 (13%).
